THE MAP

The full map: 6 more

6 things perimenopause can bring.

Brain fog

Mood changes

Migraines

Vaginal & tissue changes

Weight shifts

Still fertile

1 OF 6: BRAIN FOG

Brain fog is common

Not a sign something's wrong.

40-60%

report brain fog

2 OF 6: MOOD

Low mood often has a reason

Hormone sensitivity plus life load, not failure.

3 OF 6: MIGRAINES

Hormones can trigger migraines

Track when they hit, the pattern often follows your cycle.

4 OF 6: TISSUE CHANGES

Dryness & tissue changes, explained

GSM (Genitourinary Syndrome of Menopause):
less estrogen, more tissue changes.

5 OF 6: WEIGHT

Weight is manageable

If weight shifts bother you, small changes help, no dramatic loss needed.

6 OF 6: FERTILITY

You can still get pregnant

Keep contraception until it's confirmed.
